

Call for applications

Deadline March 8th, 2026

Hertha Sponer College

Joint interdisciplinary research training, networking, and personalized coaching for students and early career researchers from medicine and the natural and life sciences. Our vision is to spark and foster enthusiasm for academic research at the interface of natural sciences and biomedicine, and to promote early scientific independence.

Your profile

- **student** from medicine or the natural and life sciences (B.Sc., M.Sc., MD)
- **doctoral** or **MD-track** researcher,
- **postdoc** fascinated by biomedical research,
- **clinician**, research-oriented with strong foundations in the natural & life sciences

We offer

- Advanced methods training & small group seminars
- Transferable and soft skill courses
- Hertha Sponer College lecture series
- Scientific mentoring & career coaching
- Networking events with peers & experts from clinics & research
- Funding opportunities: project seed funding & travel grants
