

Hertha Sponer College

Call for applications

Deadline April 30th, 2024

Hertha Sponer College

Joint interdisciplinary research training and personalized coaching for talented students and early career researchers from medicine and the natural sciences is provided by experts of the **Cluster of Excellence „Multiscale Bioimaging: From Molecular Machines to Networks of Excitable Cells“ (MBExC)**. Our vision is to spark and foster enthusiasm for academic research at the interface of natural sciences and biomedicine, and to promote early scientific independence.

We offer

- Advanced methods training
- Transferable hard and soft skill courses
- Hertha Sponer College lecture series & small group seminars
- Scientific mentoring & career coaching by MBExC PIs
- Networking with peers & experts from clinics & research
- Stimulator funds and travel grants

Your profile

- **B.Sc., M.Sc., medical student or MD, PhD candidate, postdoc, clinical resident** (early career researcher)
- **Natural scientist** with a fascination for biomedical research **or a medical background** with strong foundations in the natural sciences
- Striving for a career in academia
